

Your family's safety isn't free.

Right-wing talk radio hosts are trying to kill the highway, bridge, ferry and transit projects approved by the 2005 Legislature. Initiative 912 would repeal the gas taxes paying for this investment in our state's transportation system, our economy and in our families' safety.

I-912 would halt more than 270 critically needed projects in every part of Washington state, including yours. (See the entire project list at www.wsdot.wa.gov/projects/funding/2005)

These projects focus on fixing our most dangerous roads and worst congestion points. They constitute a critical investment in our state, just as previous generations invested in our infrastructure to foster today's economy. **These projects will save jobs—and lives.**

Don't help the cynical anti-government talking heads kill good jobs, harm our economy, and risk the safety of our families. When they ask for your signature, **decline to sign Initiative 912.**

I-912 will cost jobs – and lives
