

Registered Apprenticeship: The Best Training Programs for Unions and Employers

The PA AFL-CIO offers unions and their employers the opportunity to participate in our Group Sponsored Registered Apprenticeship.

The PA AFL-CIO will help customize training, develop curriculum, and administer new Registered Apprenticeship, Pre-Apprenticeship programs and update inactive programs.

The PA AFL-CIO can assist unions and their employers to:

- Grow in their market through effective apprenticeships that create career opportunities for workers
- Develop and register new apprenticeships as well as add occupations to existing apprenticeships
- Work with subject matter experts at your location to customize curriculum for on-the-job-training (*OJT*) and classroom content for related instruction for apprenticeships
- Identify training providers for the program
- Align programs with high schools, career and technical centers, community colleges, community-based organizations and other training providers
- Start effective Pre-Apprenticeship programs to enroll new union members as apprentices
- Promote your apprenticeship program through the PA AFL-CIO network
- Identify local and state funding to build and sustain apprenticeship programs
- Promote joint decision making and problem solving through labor management procedures

The PA AFL-CIO and the Keystone Development Partnership will take care of the paper work. We will assume administration of the program and offer technical support for your apprenticeship. ***Our goal: Develop the best apprenticeships governed by a Joint Apprenticeship Training Council (JATC) for employers and union members.***
